## DETAILED ACTION

### *Response to Non-compliant Amendment*

1. Applicant's response to non-compliant amendment filed on August 6, 2007 has been entered by the office.

### *Election/Restrictions*

2. Applicant's election with traverse of Group I, claims 1-26, 124, 125, and 136 in the reply filed on January 12, 2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

3. The examiner notes that elected Group I contains claims directed to the following patentably distinct species:

- (1) the density of functional molecules is reduced by cleaving all or part of the molecules from the solid phase (claim 5)
- (2) the density of functional molecules is reduced by functionally inactivating the molecules *in situ* (claim 6)
- (3) the density of functional molecules is reduced by labeling some of the plurality of molecules (claim 7)

The species are independent or distinct because these species are directed to different methods for reducing the density of functional molecules.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, generic claims are claims 1-4, 8-26, 124, 125, and 136.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The elected Group I further contains claims directed to the following patentably distinct species:

(4) the molecules are defined chemical entities, oligonucleotides, polynucleotides, conjugated polymers, small organic molecules or analogues, mimetics or conjugates thereof (claims 20 and 21)

(5) the molecules are defined chemical entities, peptides, polypeptides, conjugated polymers, small organic molecules or analogues, mimetics or conjugates thereof (claim 20)

The species are independent or distinct because these species contain different molecules (oligonucleotides or polynucleotides vs peptides, polypeptides) which have different properties.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, generic claims are claims 1-19, 22-26, 124, 125, and 136.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

Art Unit: 1634

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
